Question 1:

In *Schedule of Adjustment Data - Contract Data*, there is no sub-descriptions under the description of "C: Construction Materials", for instance; C1: Steel, C2: Aggregates, C3: Bitumen etc., unlike previous tenders (RSP/W9/02 - 03 & RSP/W11/01 - 02) of SRA.

Please clarify if the tenderer is able to add sub-descriptions, similar to above, under the description of "C: Construction Materials" given in the table. If not, could you please give an example, or information explaining how could the tenderer fill the cells of source of index and base value descriptions?

Answer:

Sub-descriptions of "C" Construction Materials are not required.

As an example, Data on **Construction Materials for Houses** can be sourced as an acceptable Index from Statistica Moldovei at following link
