

“Driver's and Road Worker's Day” - 2021

Dear colleagues, employees and guests of SE “State Road Administration”, please allow me to congratulate you on the occasion of the professional holiday “ Driver's and Road Worker's Day”, as per the GD No. 1112 of 07.11.2000. I sincerely thank you for your hard and difficult work that you accomplish every day, regardless of the weather conditions or any other type of problems.

The road worker's activity involves multiple tasks and issues, related to routine maintenance, current repairs, reconstructions, rehabilitation, design and construction of new roads, laboratory and research activities and. last but not least, office work, where the management of the enterprise is actually implemented, including the current and planned activities, the elaboration of norms and legislative proposals, the initiation of new ideas and transfer of technological know-how.

The quality assurance of the two distinct objectives for the “Safety” and “Comfortable” roads for traffic depends, mainly, on our daily activities, on the digitization of the processes, on the continuous communication with the local authorities, as well as on the institutions outside the country. Additionally, for these purposes, it is important to note the openness and transparency of our activities, the promotion of young specialists and the professionalism of professors who educate and raise the young generation of road workers for the transport infrastructure branch.

On this occasion, we congratulate the veterans of the professional field of road infrastructure, those who have worked with dedication for the creation and continuous maintenance of S.E. "State Road Administration" and the entire branch, regardless of their employment position, from simple worker, engineer, director or minister.

Congratulations to our colleagues – the drivers, without whom the implementation of road projects is impossible, focused on the contribution that transporters bring to the development of infrastructure.

The construction of roads of a strategic importance for the state cannot be done by our own forces and resources, so I would like to address our cordial thanks to our development partners, especially the World Bank, EIB, EBRD, Council of Europe and all those who have contributed and continue to do so for the development of Republic of Moldova's infrastructure, including also the consultancy and technical supervision institutions.

We thank the Government of the Republic of Moldova, the Ministry of Infrastructure and Regional Development in the person of Deputy Prime Minister Andrei Spinu and the Public Property Agency, especially the General Director Eugeniu Cozonac, for their trust and involvement in solving problems in the road infrastructure.

Finally, we thank your families and wish them all the best. We are sure that those at home support you and understand that road work is honest, creative and respected by the society.

We are convinced that only together, united and correct while working in this field, we will be able to bring the infrastructure of the Republic of Moldova to a respectable level and accepted by all traffic participants and to reach the level of satisfaction in ensuring Safety and Comfort!!!

Thank you!!!

With respect,
Interim General Director of SRA,
Sergiu BEJAN.
