
**REPUBLIC OF MOLDOVA
ROAD SECTOR PROGRAM**

STATE ROAD ADMINISTRATION

**CLARIFICATION DOCUMENT No.2 TO THE
TENDER DOCUMENTS**

**Construction of M3 Vulcanesti Bypass, km 0+000 - km 8+580
under the Contract RSP/W14/01**

Issued on March 03, 2023

Question 1

The time of completion of the recent ongoing tenders (Construction of Road M3 and Construction of Road R14 and R8) issued by the Client are all set at 915 days. The scope of work of the project at hand (Construction of Road M3 Chisinau - Comrat - Giurgiulesti - Romanian border, sector Vulcanesti bypass (km 0+000 - km 8+580)) is however quite smaller than the other aforementioned projects. The Bidder hereby requests from the Client to allow the Bidder to propose an alternative time of completion (Shorter), which has been restricted by the Bidding Document clause ITB 12.1, as in the opinion of the Bidder, will provide for a much more competitive and beneficial final offer to the Client.

Answer

The time set in the tender documents is the maximum term within which the Participant shall complete the works. Participants are free to arrange their contract performance activities in a fashion to complete the works at any point within the respective term.

Therefore, the respective term sets no limitations as to the earlier term when the Participant might want to complete the works.

Question 2

[This matter is brought by the Employer and relates to the Technical Specifications].

Answer

The Technical Specifications, have been replaced in its entirety. For the ease of reference by the Participants to the clauses being changed, a version with tracked changes of the modified text, is provided to the Participants and could be downloaded at:

http://files.asd.md/Directia_investitii/2023.02.14_Technical_Specification_M3_oc.Vulcanesti_Ver_Track.zip

Such version is not part of the Tender Documents. In case of any discrepancy between the version at hand and the clean version of the updated Technical Specifications attached to the Addendum no.2, the latter shall apply.
